“KLASSIK”

The German tradition

Easy use:

Quickly set, this ligature offers a perfect adequacy between the reed and the mouthpiece.

The fiber of the strap was selected for its excellent elasticity and its great resistance. The thin weaving fits perfectly the shape of the reed and the mouthpiece and takes part in the vibration of the reed.

Two independent running knots allow a personalised tightening. The weaving can be more or less tightened, at the top or at the bottom of the ligature, offering a great scope of choices of tone colors.

The weaving of the ligature, in contact with the heel of the reed on a large surface, gives an ample and centered sound. The great freedom of vibration allows you to “shape” your sonority.

KLASSIK ligature is supplied with its “wooden support” in order to keep perfectly its shape.

KLASSIK ligature fits all Bb clarinet mouthpieces.
