## SUEDE & BLACK SUEDE

Suede® heads are a new generation of drumheads that utilize exclusively developed films and processes to offer several advances in sound and performance. Suede's proprietary process creates a texture on both sides of the head that enhances the production and reflection of sound creating a voice that's a cross between the brightness and resonance of clear heads and the midrange articulation of coated.

**BLACK SUEDE™** drumheads provide focused warmth, enhanced mid-range for snare drums and tom toms without muting their percussive attack.
