Silent Brass Systems (a set of a module and a mute) for Trumpet and Cornet

THE YAMAHA ADVANTAGE

Yamaha's Silent Brass System offers the advantage of practising or playing at times, and in places you couldn't before. Simply plug in earphones to hear yourself in your own personal performance environment. The internal electronics can also enhance the sound digitally, to mimic the acoustics of a larger room. You can play along with your favourite pre-recorded music by plugging in a CD favourite or use the output jack to connect to an external amplifier/recorder to share your music with others.
