THE YAMAHA ADVANTAGE

The SV250 and SV255 are designed to meet the needs of the professional and high class amateur performer wanting amplified violin sound. This new violin establishes a new benchmark for sound quality and player comfort. With its weight of only around 500 g it has the same weight of a traditional acoustic violin. The violinist can easily convert from their current acoustic to our new silent violin. The innovative dual pick up system allows the performer to a blend the tone quality from electric to a rich acoustic sound. The external control box contains a powerful pre-amp, master volume control, treble and bass tone controls, as well as quarter inch and XLR balanced outputs. Both models are crafted from seasoned flamed maple, spruce top and fit with ebony pegs and fingerboard.
