

SCHAGERL

NEW

The sound of Las Vegas!

The brilliant, radiant sound of this instrument is based on the tonal concepts of the legendary Las Vegas studio and big band trumpeters, who were heard night after night along the Las Vegas strip.

This new model has everything a professional trumpeter needs: a one-piece handmade bell for perfect projection, high-quality monel valves, and slide stops on both first and third valve slides. The ML bore and 0.5 MM brass thickness insure a compact feel.

The brass Scodwell leadpipe offers a

characteristically smooth blow and great sound projection. Tony Scodwell took an integral role in Schagerl's development of this leadpipe: in his 40 plus year career he appeared as lead trumpet in the bands of Harry James, Tommy Dorsey, Doc Severinsen, and Frank Sinatra. In the 1970s he performed with a nearly all of the most important stars in Las Vegas.

All „Las Vegas“ model trumpets come with an original Schagerl Superior Trekking case and high quality Schagerl mouthpiece 3C.
