

⊖ Symphony Series #1 Rim Comparison = Schilke 19/20 or 1C

Model	throat	Description
M1	24	Standard bowl shape "C" cup with a 24 throat and Schmidt backbore. Excellent all around mouthpiece for both C and Bb trumpet.
M1C	27	NEW – Standard bowl shape "C" cup with tighter 27 throat and Schilke C backbore. A wonderful option for the player that desires a balanced, compact feel with more resistance than the M1 model.
M1D	24	Standard bowl cup with 24 throat and TIGHTER Schmidt backbore. Very good option for either Bb or Eb trumpet playing.
M1*	24	The "*" models share same rim and cup as the 'M' and "MD" models. They have a LARGER Schmidt backbore with a shorter throat that creates less resistance and a more open feel.
D1	24	Deeper bowl shape cup that still provides feedback for control. The 'D' cups have a smaller version of the Schmidt backbore, tighter to balance the deeper cup.
F1	20	The 'F' models offer a deep "V" shape cup that provides darker, warmer, more conical color allowing one to project at full capacity but maintain a soft mellow sound. These models utilize a shorter shank to compensate for cup volume plus a larger throat size & backbore taper.

⊖ Symphony Series #150 Rim Comparison = Schilke 18 or 1.25C

Model	throat	Description
M150	24	Slightly smaller '150' Rim diameter, standard bowl shape "C" cup, 24 throat and Schmidt backbore.
M150C	27	NEW – Slightly smaller '150' Rim diameter, standard bowl shape "C" cup with tighter 27 throat and Schilke C backbore.
M150D	24	Slightly smaller '150' Rim diameter, standard bowl shape "C" cup, 24 throat and TIGHTER Schmidt backbore.
M150*	24	LARGER Schmidt backbore with a shorter throat in a 150 rim diameter. More open feel.
D150	24	Deeper bowl shape cup in '150' rim diameter.
F150	20	'F' cup model with shorter shank in '150' diameter. Offers a dark, mellow sound.

Symphony Series #2 Rim Comparison = Schilke 16C4/17 or 1.5C

Model	throat	Description
M2	24	Slightly smaller '2' Rim diameter, standard bowl shape "C" cup, 24 throat and Schmidt backbore.
M2C	27	NEW – Slightly smaller '2' Rim diameter, standard bowl shape "C" cup with tighter 27 throat and Schilke C backbore.
M2D	24	Slightly smaller '2' Rim diameter, standard bowl shape "C" cup, 24 throat and TIGHTER Schmidt backbore.
M2*	24	LARGER Schmidt backbore with a shorter throat in a 2 rim diameter. More open feel.
M2X	24	This model has the rim, throat, and backbore of a M2 but the cup shape of the M1 for slightly more cup volume.
D2	24	Deeper bowl shape cup in '2' rim diameter.
F2	20	'F' cup model with shorter shank in '2' diameter. Offers a dark, mellow sound.

Symphony Series #3 Rim Comparison = Schilke 15/14 or 3.0C

Model	throat	Description
M3	24	Slightly smaller '3' Rim diameter, standard bowl shape "C" cup, 24 throat and Schmidt backbore.
M3C	27	NEW – lightly smaller '3' Rim diameter, standard bowl shape "C" cup with tighter 27 throat and Schilke C backbore.
M3D	24	Slightly smaller '3' Rim diameter, standard bowl shape "C" cup, 24 throat and TIGHTER Schmidt backbore.
M3*	24	LARGER Schmidt backbore with a shorter throat in a 3 rim diameter. More open feel.
D3	24	Deeper bowl shape cup in '3' rim diameter.
F3	20	'F' cup model with shorter shank in '3' diameter. Offers a dark, mellow sound.

Symphony Series #4 Rim Comparison = Schilke 14/13 - Between 3C and 5C

Model	throat	Description
M4C	27	New from the Schilke custom mouthpiece department, the M4C 'Symphony Series' trumpet mouthpiece offers a comfortable rim profile and provides a full, vibrant sound! Created to meet the demands of an aspiring student or professional requiring a smaller inside rim diameter between M3C and M5C models. It features a standard bowl shape "C" cup with tighter #27 throat and Schilke C backbore.

Symphony Series #5 Rim Comparison = Schilke 13 or 5C

Model	throat	Description
M5C	27	NEW – Slightly smaller '5' Rim diameter, standard bowl shape "C" cup with tighter 27 throat and Schilke C backbore.
