YCR8620SII	\$3,899

## THE YAMAHA ADVANTAGE

The Neo cornet range provides a greater breadth of tone and expression emotion in an enriched sound world. The use of Gold brass for the lead-pipe, connection tube and main tuning slide give these new cornets a rich, flexible sound and excellent response in the higher register. Developed with 3 of the brass band world's most successful cornet players and conductors, these highly expressive cornets bring new musical possibilities to both solo and band performances.
