Bore Size	M: 11.65mm (0.459")
Bell Diameter	127 mm (5")
Bell Material	Yellow Brass
Mouthpiece	TR14B4
Included Accessories	

YTR8335LA

Features

Developed in conjunction with
Wayne Bergeron

The Custom YTR8335LA B^b trumpet was developed in cooperation with famed LA studio veteran Wayne Bergeron.

- Special bead and bell taper; large bore tuning slide
- Gold brass; Modified Z leadpipe
- Mother of pearl key buttons

Designed for players needing an open instrument that is flexible and free blowing, the YTR8335LA utilises the same bell as the YTR8310Z and adds a large bore tuning slide and a Malone MB1 leadpipe.

Outstanding attention to detail including the lavish French bead and side seams in medium-large bore tubing results in superior operability with strong, brilliant tonal colors suited to various genres, particularly jazz or popular music.

Perfect for the needs of both the soloist and the lead player in the trumpet section.

Modified Z leadpipe taper

The modified taper allows for high air capacity and a quick, controlled response.

Modified 8310Z bell

The modified bell shape leads to a projecting, brilliant and complex sound.

All-brass valve casing

Brass valve casings aid response, change the sound characteristic and provide a broad range of overtones.

Large bore tuning slide

The larger bore perfectly balances the resistance level for players requiring a more open feel.
