

# Custom EX SAXOPHONES

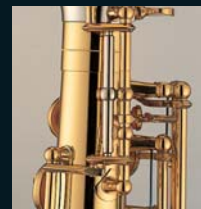

*The most sophisticated sax there is...*

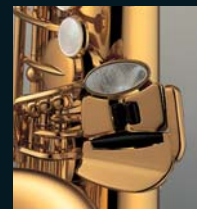

Improved versions of that proven classic the Custom 875, the EX saxes are the result of decades of painstaking research and trials involving some of the world's greatest saxophonists. They feature a smooth response and a deep, refined sound full of rich colors. They also feature a solid feel with quick and nimble action, a wide dynamic range, stunning projection, and an authoritative tone with a beautifully defined tonal core. You will find that the depth and smoothness of their sound is simply incredible, and you will also find that these horns are very flexible, at home in any kind of music. The size and shape of the key buttons have been changed for a better 'feel', while the new Custom necks enhance tonal resonance and give a quicker, more comfortable response. And the saxes feature a two-point bell brace for better efficiency, so you don't have to work as hard to sound great.

The EX alto features a G1 neck while the tenor model has the new G3 neck. Both are handmade and offer highly accurate intonation with an improved response.

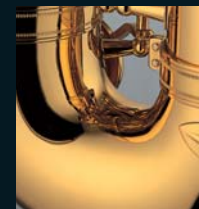

The octave key (shift key) has a unique new ball joint design for smoother, quicker action. The new neck receiver improves the tonal resonance.

The left-hand seesaw key (B $\flat$ ) has been redesigned to facilitate playability as well as feel more comfortable.

The bell/body brace features two-point contact for enhanced projection and a free-blowing response.

The center-bow reinforcement plate has been removed on the EX alto for a free blowing resistance.

**Option** • EX saxes are available with gold plate, silver plate, and black lacquer finishes by special order.

*Custom*
