

Bass, Alto and E \flat Clarinets

Yamaha Professional Model bass clarinets, all of which are meticulously crafted by hand, give you a rich, warm sound with powerful projection and extremely accurate intonation. Each tonehole undercut is individually shaped for a beautifully balanced, remarkably responsive instrument. The YCL-621II can play down to low E \flat , while the YCL-622II's range extends to low C.

And for the first time Yamaha is offering a matte finish ABS resin bass clarinet with a tone quality very

close to that of a professional wood model. It's the YCL-221II, whose design is based on that of our pro model YCL-621II. This instrument boasts several important new features, including a neck angle similar to that of a soprano clarinet, and a unique joint connector which makes it easy to assemble the main body—thus permitting a compact case.

Our E \flat clarinets can be found in many of the world's top orchestras and feature accurate intonation and a rich resonant sound full of color and warmth.

Yamaha's top-of-the-line bass clarinet, which can play down to low C.

Professional
