

Custom Z SAXOPHONES

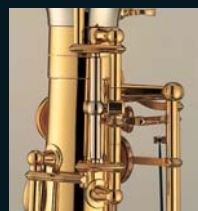

This one can really take you there...

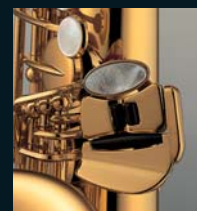

This has to be one of the most exciting things to happen to the sax world in modern times. Finally: a modern sax that actually captures the sound and feel of those treasured classic saxes of the past!—while adding state-of-the-art intonation and mechanism. Based on the scale of the classic '62' models, the new Custom Z saxes have bodies that are made of a special brass alloy for lighter weight, a great playing 'feel,' and the kind of tonal flexibility you've always dreamed of. The Z plays evenly in all ranges, and gives you a huge dynamic range for as much—or as little—sound as you want. The Custom G1 neck helps produce a quick and agile response, while key action and placement feel just right. You can create whatever style tone you're after, from vintage to contemporary, and there's no need to sacrifice comfort for sound. These horns literally 'have it all'.

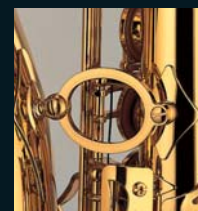

The Custom G1 neck improves tonal projection and frees the upper register (a gold-plated G1 neck is optionally available).

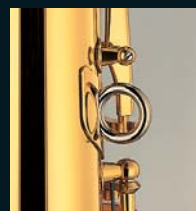

The octave key (shift key) has a unique new ball joint design for smoother, quicker action.

The left-hand seesaw key (B \flat) has been redesigned to facilitate playability as well as feel more comfortable.

The bell/body brace features two-point contact for enhanced projection and a free-blowing response.

The neck strap ring is oversize to accommodate a variety of hook sizes.

- Options**
- Z saxes are available with gold plate, silver plate, black lacquer, or unlacquered finishes by special order.
 - The YTS-82Z can be ordered without a high F \sharp key for a more efficient response.

Custom
YAS-82Z (Alto)

- Front F mechanism
- With high F \sharp key

Custom
YTS-82Z (Tenor)

- Front F mechanism
- With high F \sharp key

The Z saxes come in a slim ultra-lightweight case which provides excellent protection. A convenient shoulder strap is also included.
